

## *-GECET<sup>TM</sup> in Automotive*

### *GECET<sup>TM</sup> vs. Steel*

- . Considerably Less Weight*
- . Less Cost*

## *- GECET<sup>TM</sup> vs. Other Foams*

### *EPP (Expanded Polypropylene)*

- Unstable at Increased Temperatures (150°F)*
- Higher Tooling Cost*
- Higher Processing Cost*
- Under 2.5pcf EPP needs post molding oven cure*
- Lower Raw Material Cost*
- EPP is Heavier for the Same Performance (20-25%)*
